

Re-introduction of 3-8 Series

AMEC is pleased to announce the re-introduction of 3-8 Series Original T-A[®] HSS inserts with AM200[®] coating as a stocked item in metric sizes (36mm to 114mm Ø)

3 and 4 Series are available from stock in Super Cobalt with AM200[®] coating in 1mm increments (36mm to 65mm Ø)

5 to 8 Series are available from stock in HSS CPM-M4 with AM200[®] coating in 2mm increments (64mm to 114mm Ø)

Features & Benefits

- AM200[®] coating for superior heat and wear resistance compared to TiN, TiCN, and TiAlN coating
- Original T-A[®] chisel geometry – offers a robust point for poor rigidity applications
- First choice for AMEC's XL and 3XL extra length holders
- Designed and manufactured by AMEC for added performance and productivity
